

Cookies

To make this site work properly, we sometimes place small data files called cookies on your device. Most big websites do this too.

What are cookies?

A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, font size and other display preferences) over a period of time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another.

How do we use cookies?

- *Purpose: Cookies are being used to remember the users' actions and prevent repeated login prompts.*
- Cookies aim to enhance and monitor the performance of the website.
- Types of cookie: Both session and permanent cookies are used, first-party only.

The hosts of the website and the European Commission control and can access cookie-related information.

The cookie will not be used for any other purpose than stated herein.

How to control cookies

You can **control and/or delete** cookies as you wish – for details, see aboutcookies.org. You can delete all cookies that are already on your computer and you can set most browsers to prevent them from being placed. If you do this, however, you may have to manually adjust some preferences every time you visit a site and some services and functionalities may not work.
